347 KeyId      : https://contoso.vault.azure.net/keys/contosokey/012345678901234567890

```

```
// read all r.Body into a byte array
body, err := ioutil.ReadAll(r.Body)
if err != nil {
    http.Error(w, "failed to read request body", http.StatusInternalServerError)
    return
}
```

`ioutil.ReadAll` is deprecated: As of Go 1.16, this function simply calls `[io.ReadAll]. deprecated(default)`

```
func ioutil.ReadAll(r io.Reader) ([]byte, error)
```

`ReadAll` reads from `r` until an error or EOF and returns the data it read. A successful call returns `err == nil`, not `err == EOF`. Because `ReadAll` is defined to read from `src` until EOF, it does not treat an EOF from `Read` as an error to be reported.

Deprecated: As of Go 1.16, this function simply calls [io.ReadAll](#).

[ioutil.ReadAll](#) on pkg.go.dev

No quick fixes available

```
body, err := io.ReadAll(r.Body)
if err != nil {
    http.Error(w, "failed to read request body", http.StatusInternalServerError)
    return
}
```
